ABOUT TEZA

- ❑ TEZA is a company oriented to the latest technologies and means for lifelong learning.
- ❑ TEZA expands the palette of services offered in the field of education, professional development and management of the organizational talent.
- ❑ TEZA's activity is focused in the field of traditional and electronic educational services and technologies.
- ❑ TEZA constantly improves the quality of the offered products and services. In 2006, we created a fully equipped computer training center, and in 2007 we received ISO 9001:2000 certification for performance of services in the field of professional trainings and supply and installation of specialized applications that we maintain and improve successfully to this day.
- ❑ During the last five years TEZA built a capacity to work on large and complex projects in the field of the specialized and professional trainings for private and public organizations.

MISSION

TEZA strives to comply with and adapt to the ever-increasing criteria of its customers, which are an expression of the constant introduction and use of new technologies on the market that require new knowledge. In order to meet the current requirements, the company offers training solutions taking into account multiple criteria - life cycle of the technologies, status of the employees, time for training, degree of familiarization with the products etc.

TEAM

The TEZA team consists of highly qualified professionals in project management, consultants, designers, programmers, trainers and network engineers, who deliver the best services for our clients. We work together with the best IT professionals, certified by high standards of Microsoft, Cisco Systems, Oracle, Hewlett Packard, etc. Our team provides its expert knowledge to implement the right solutions for our clients.
